Official news letter of Karnataka State Chapter of Association of Surgeons of India Issue: 2/18: July 2018

From Editor's pen

Dear senior colleagues and friends,

Greetings from KSCASI.

There has been less branch activities in these past couple of months and some of the branches, though conducting activities, are not reporting in proper time. Kindly report all activities immediately to the secretary. This will be uploaded to website for permanent record purposes and will be published in Shashtra as well. As an additional incentive, our association is awarding prizes in three categories to best performing branches: big, medium and small branches. If you do not report, none of these are possible. Hence, I request all branches to report regularly. It may be reminded that a banner with KSCASI name and logo should be clearly visible in the photo to consider the activity as branch activity.

In the general body meeting many significant decisions were taken. Please note and inform all PG students, they will not be allowed to present papers/posters unless they become associate members of ASI. To avoid last minute problems and tension, make sure that all PG students become members at the earliest. Please plan for next conferences KSCASImidCON 2018 (Mysuru) and KSCASICON 2019 (Ballari) from now and get ready with the papers and posters well in advance.

Mysuru branch will be hosting KSCASImidCON 2018. Dates are finalized: Aug 25th and 26th 2018. For details visit our website. Presentations in KSCASImidCON also carries same weightage as presenting in KSCASICON, as both are official programs of KSCASI.

Registration to KSCASICON 2019, (15-17 Feb 2019) Ballary is also started. Kindly visit the website kscasi.com for details and register at the earliest to make it a grand success.

Long live KSCASI,
Regards,

Dr Ramakrishna HK

MS, DNB, FMAS, FRCS (Glasgow)

Official news letter of Karnataka State Chapter of Association of Surgeons of India Issue: 2/18: July 2018

Chairman's message

My dear fellow members of KSCASI,

I feel myself proud and honored to be on this Chair. It was with great pleasure to attend a CME at KMC Hubli on 10th March 2018. Excellent lectures were given by our state surgeons. I congratulate Dr Gurashantappa Sir and his team for this CME.

On 11th myself with Dr Narayan Hebsur attended national EC meeting at Chennai. A presentation was made on Accounts of ASI and Social security scheme by the experts. I am proud to share here that Karnataka surgeons are first in number compared to other states covered under this Social security scheme.

I attended a CME at KMC Manipal, on 22nd April 2018. It was my privilege to participate in all scientific activities. Special thanks to Dr Rajgopal Shenoy Sir.

On 24th June we were at Mysore to perform a great job. All our executive committee members participated in this meeting. It was not just a meeting but with full of memorable moments. On behalf of all the members of Karnataka surgeons I express my thanks and congratulations for the generous contribution done by Mysore Surgical City Chapter towards KSC-ASI. Whole day we spent with all the members of Mysore city chapter. Special thanks to

Dr Siddesh, Dr Chandrashekhar and their team for the hospitality for all of us. We will be again their guests of honour for the first Midconference of KSC-ASI on 25th and 26th of August. Again it is a remarkable event in the history of Karnataka State chapter as first Midconference is arranged at Mysore. This event should be continued every year and state chapter should seriously think about the financial aids to facilitate and support such academic activities.

On 27th to 29th we are to attend a Refresher course at Bengaluru organized at BMC Bengaluru under ASI. Attending postgraduates will be benefited by this refresher course as it is covering all important surgical topics.

On 2nd of September we are attending a CME at Gadag with Dr Hebsur, Prof. Ashok Godhi

Karnataka State Chapter of Association of Surgeons of India

ಸೇವೆಗಾಗಿ ನಾವು

Official news letter of Karnataka State Chapter of Association of Surgeons of India Issue: 2/18: July 2018

Sir and others.

The preparations for the state conference at Bellary are at full swing under the leadership of Dr Vidyadhar Sir, and as Dr Hebsur puts it, one EC meeting will be held at Bellary before the state conference.

We will be attending the national conference at Chennai and will be meeting great surgeons of our nation. As of now our state is full of surgical activities by all the city chapters.

Through this letter I request all of you to join social security scheme of ASI. Please write to Dr Ramakrishna about your feelings, activities, opinions, and doubts about our association and will be discussed at EC meetings and printed in E-Shahstra.

Long live KSC-ASI

Dr Dayananda Nooli
Chairman, KSCASI 2018

Secretary's message

Dear Members,

We from KSCASI extend our whole hearted gratitude to Mysuru ASI branch team for contributing big way to ASI & KSCASI, Our Chairman Dr Dayanand Nooli recognized & felicitated them in our EC Meeting held on 24th June 2018 at Mysuru, and now they have taken up the KSCASImidCON 2018, to be held on 25th & 26th August 2018 at Mysuru. We request all the members & post graduates to support them by Registering & participating in this Event.

Torrent Young Surgeons Award -RRC & FAIS Program was held on in BMC under ASI was very well organised by our EC member, Prof & HOD, Dr Seshagiri Rao.

More than 450 PGs registered & attended the program.

Free Surgical Camp was conducted at Dandeli on 4th & 5th August 2018 at Dr Mohan Patil Nursing Home. Deserving very poor patients from remote places were served. He provided his wonderful infrastructure totally free. Camp was organised by our National EC Dr SS Soppimath.

ASI President Dr Dilip Gode, National EC members Dr Bindiya Kumar & Dr Nikhil Singh joined us & operated with us from KSCASI Our ever energetic Chairman Dr Nooli , Myself & Our EC member Dr K G Byakodji, from Hubli, ASI chairman Dr Ramesh Hosamani & secretary Dr Abhijit, KIMS Prof & HOD Dr Gurushantappa Y & Prof Dr Ishwar Hosmani participated in the program. Our chairman, Dr Nooli, is shortly planning to conduct a similar camp in his nursing home.

I request all the presidents & secretaries of the city branches to encourage all your members to become members of Social Security Scheme of ASI & Indemnity Insurance scheme.

I feel proud to say that all the branches of our state are conducting all academic activities & we are receiving the reports of some branches regularly & some are not reporting. I request all the branches to report regularly.

KSCASICON 2019, Ballari is getting set Up for the annual academic feast. We humbly request all members to register at the earliest & oblige.

Long Live ASI,

Dr Narayan Hebsur
Hon. Secretary, KSCASI

37th Annual Conference

Karnataka State Chapter of the Association of Surgeons of India

KSC ASICON 2019

Hosts - KSC-ASI, Ballari
Venue : VIMS, Ballari
15th - 17th February 2019

Dear Esteemed Colleagues,
Warm Greetings from the Organizing Committee of KSC ASICON 2019. We thank all the office bearers and you all for giving us the opportunity to host this prestigious conference. It gives us immense pleasure to invite you for forthcoming 37th State Conference to be held at VIMS Ballari in February 2019. We have been conducting 'SURGIQUEST' CME successfully for past seven years annually. We, at VIMS, Ballari recognize that modern surgery is effort-intensive and technology-dependent. We hope to ensure this through extensive scientific deliberations, World Class Live Workshop from National & International faculty, Master Quiz, & PG Master Class for Surgical skill enhancement of the young surgeons and upcoming consultants.

We welcome you to this historic surgical event at Ballari.

The 'C S' Rules for effective Communication in Surgery

1. **Cool Stature** most important. Never show haste, urgency, irritability
2. **Cheerful Salutations**, as greetings for time of day, use of first name of patient
3. **Concerned Sympathy** [Empathy] to be shown, and felt by the patient
4. **Clear Speech**, being simple, audible and in language of understanding
5. **Careful Selection** of words, to level of understanding, avoiding medical jargon
6. **Constant Sight** alignment, to ensure eye contact.
7. **Correct Statements**, means one must know all the facts.
8. **Connected Sequence** of information exchange, not 'beating about the bush.'
9. **Confidence Stimulating**, of being encouraging, in what is an unfortunate health issue.
10. **Courteous Smile** always.

Dr C S Rajan, Past Chairman of KSCASI, 2016-17.

ACTIVITIES REPORT OF SURGICAL SOCIETY OIF BENGALURU ASICC – JAN – JUNE 2018

I acknowledge with sincere thanks all the help of honorable members, seniors, mentors teachers and friends during the LAST 6 MONTHS tenure in successfully, satisfactorily and gracefully.

We started the year with first executive committee meeting (Executive Committee Meeting) on 9 January 2018 along with senior surgeons and all the heads of the Institutes taking part in the academic activities of the society, which was well attended and work was carried forward keeping in mind all the suggestions. It was unanimously agreed to intimate the members about the activities electronically by email, Whatsapp message and on the website. We formed various whatsapp Groups involving EC members, postgraduates and Monthly Clinical Meetings and progress was reviewed in the subsequent EC meetings so as to remain efficient: -

The monthly clinical meetings (MCM) were all held at the central location, API Bhavan except for the Command hospital MCM. In all MCM post graduate teaching sessions were conducted from 6.30 pm. The attendance were excellent most of the Postgraduates In Surgery from Various Teaching Hospitals were actively participated. This was followed by poster presentation and free

Journal Scan: Contributed By Dr Ramakrishna HK

Is antibacterial coating of suture material helpful in preventing infection?

Kosuke Ichida, Hiroshi Noda, Rina Kikugawa, Fumi Hasegawa, Tamotsu Obitsu, Daisuke Ishioka et al: Effect of triclosan-coated sutures on the incidence of surgical site infection after abdominal wall closure in gastroenterological surgery: a double-blind, randomized controlled trial in a single center. j.surg.2017.12.020.

This study compared surgical site superficial or deep infections (within 30 days of operation) after abdominal wall closure with Triclosan coated sutures (study group) and non-coated sutures (control group). There were 508 patients in study group and 505 patients in control group.

Conclusion: Triclosan-coated sutures did not decrease the incidence of surgical site infections after abdominal wall closure in gastroenterologic surgery.

Can we give levothyroxine weekly instead of daily in hypothyroidism?

Rajput R, Pathak V. The Effect of Daily versus Weekly Levothyroxine Replacement on Thyroid Function Test in Hypothyroid Patients at a Tertiary Care Centre in Haryana. Eur Thyroid J. 2017;6(5):250-254

In a cross-over study comparing daily verses weekly levothyroxine therapy, it was found that both are effective.

Authors' conclusions: "Our study shows that in today's era of busy and hectic schedules where it is difficult for patients to take LT4 following a rigid schedule, once weekly LT4 administration provides an alternative approach for the treatment of hypothyroidism, especially in patients where compliance is a major issue".

Simulation in Medical Education -Dr Ashok Godhi

For more than a century, the medical students are being trained using 'Apprenticeship Model' of William Halsted; it cannot be overemphasized that the model has served its purpose; however, of late, modern approach and attitude of the community and the medical profession towards each other, have necessitated some modifications in the teaching learning process. Students learn the procedural skills by performing them on real patients. 'Learning curve' is an inseparable part of any leaning process and so are the errors. The Institute of Medicine has reported that in USA, every year 43000 to 98000 deaths occur due to preventable errors in the management of the patients; hence 'patient safety has come into sharp focus in the recent years. Patients expect that the trainees should have minimum levels of competence before they treat them. Errors are least tolerated and are often challenged in the consumer forum. Graduating students feel that there is a gap between their level of competence and the level expected by the society. Their learning depends on the type and variety of patients available in the wards and out patients at the time of their posting. Large number of medical students and limited number of patients also restrict experience. Efforts to address these limitations of the present system of medical education have resulted in revelation that simulation can provide some answers to these problems.

Simulation has been used for decades in the aviation industry to train the pilots. Simulation in medical education is comparatively a recent concept. The simulation laboratories provide safe opportunities to medical students to learn technical and non technical skills and practice them repeatedly until the predetermined proficiency is achieved. They can learn from their errors without compromising the quality of patient care. The learning experience is enjoyable and it conforms to the principles of adult learning.

Simulation technology in medical education is rapidly evolving. Use of standardised patients is the simplest simulation to teach history taking, physical examination and communication skills. Animal activism and ethical issues are slowly replacing experiments on live animals by computer simulated experiments. In some western universities anatomy is taught with the help of virtual cadaver dissection. Anaesthesiologists were among the first ones to conceive and develop models and mannequins to teach airway management and CPR. Birthing simulator is used to teach delivery. Models to teach IV access, central venous access, lumbar puncture and catheterisation are very useful. Basic skills of surgery and its subspecialties are best learnt in the skills laboratories using synthetic simulators or animal tissues.

Computerised mannequins have added a new dimension to the simulation technology. The

Karnataka State Chapter of Association of Surgeons of India

ಸೇವೆಗಾಗಿ ನಾವು

Official news letter of Karnataka State Chapter of Association of Surgeons of India Issue: 2/18: July 2018

modern mannequins provide real life-like learning experience; they speak and breathe; they have cardiac, respiratory and bowel sounds, radial and carotid pulse, blood pressure and reacting pupils. They can be programmed to mimic various emergency scenarios like cardiac arrhythmia, cardio respiratory arrest, respiratory strider, cyanosis, difficult airway, and tension pneumothorax. The mannequin responds to pharmacological interventions, CPBR and defibrillation. The scene is so realistic and dramatic that sometimes medical students cry when the mannequin 'dies'. Similarly neonatal and infant mannequins are used to teach paediatric students.

Laparoscopic and endoscopic surgeries have been a giant leap forward in advancing the art and science of surgery in 21st century. They need skills different from open surgery; the basic laparoscopic skills can be learnt on simple box simulators; advanced laparoscopic operations with different levels of difficulty can be practiced on virtual reality(VR) simulators. The latest VR simulators with haptics are capable of providing tactile feedback. VR simulators are very useful for teaching/learning endoscopic procedures like bronchoscopy, upper and lower GI endoscopy and endovascular procedures.

The future of simulation appears exciting. It may be possible to load the patient-specific data in to VR simulator and try pharmacological intervention or rehearse the laparoscopic surgery on the virtual patient before doing it on the real patient. The virtual patient of the future may be able to give history, exhibit physical signs and show human, social, and behavioural responses with appropriate facial expressions.

Medical colleges have a great responsibility of preparing safe doctors for the future; the simulation exercises must be structured to design curriculum which is integrated in to the existing curriculum; the skills learnt in the simulation lab are assessed to grade the level of competence; The practicing physicians also can learn new skills on the simulators. Medical education regulating councils can play an important role in establishing simulation centres in the medical colleges.

JNMC experience:

We, at J N Medical College, are one of the first few colleges to establish the simulation centre called 'Clinical Skills Lab' in 2010, funded by KLE Academy of Higher Education and research(KAHER). The lab has received an award of Rs.30 lakhs from the Vision Group of Science and Technology of Govt. of Karnataka. Ever since its inception, the lab has been active in training the students of not only medical college, but also other health care institutions of KAHER. The workshops are regularly conducted on BLS, ACLS, basic surgical skills and

Karnataka State Chapter of Association of Surgeons of India

ಸೇವೆಗಾಗಿ ನಾವು

Official news letter of Karnataka State Chapter of Association of Surgeons of India Issue: 2/18: July 2018

basic laparoscopic surgical skills. KAHER has decided to take the lab to the next level by setting up a Cadaver Lab which is likely to be functional in the next few months.

‘Halstedeian Apprenticeship Model’ has stood the test of time for more than a century. Simulation technology is going to enrich this model, enhance the learning experience of students of health care institutions and improve patient safety in the years to come. Simulation is not a replacement for the traditional method of medical education but is complementary to it.

Investment of time and funds in simulation technology is going to pay rich dividends. Earlier we adopt it, the better it is.

Prof. Ashok Godhi,

Prof of Surgery

Former Principal, JNMC & Dean KAHER

Important information to city branches

1. State chapters need to use ASI PAN
2. Chapters need to have own GST number apart from ASI GST no
3. Receipts must show breakup of amount.
4. State must file GST return after any financial receipt.
5. Update ASI on any transactions, FDs, TDS at least every 3 months.
6. Any conference held under aegis of university/college are exempt from GST.

Any clarification may be asked for from ASI Auditors at

Talent Corner By Dr Naaz

The Hernia We See...

That Defect in the abdominal wall
Let go the contents, which now begin
to fall
An innocent looking bulge at a very
wrong place
Is a cause of misery and a frown in the
face.

Tactfully and gently ... It was possible to
reduce
Until one day it failed and was a cause
for abuse
The saga of pain and swelling was now
very frequent
It was time now to see an expert to
close the rent!!

One by one ..the curtain began to fall
An AWR surgeon could now see it all
A sono and a C.T did show the defect
An MRI would also be very perfect.

The size of the defect was to be assessed
And the loss of domain was not to be missed.
That non anatomic fold seen at last...
Was a reminder of the prosthesis used in
the past.

An Ipom , a TAR, a Scola or a
MILOS ...may be selected
And aTAPP or aTEP ... based on expertise re-
sults are expected.
Between Onlay, inlay and a sublay one must
choose
To decide, put your feet in the the pa-
tient's shoes!!

To do the best ... Choose the mesh
Synthetic, dual or biological .. every case is
a fresh
To Handle with Care ...is the rule
If infected you will feel, worse than a fool !!

Learn the components of the abdominal wall..
A thorough study of anatomy ..must
be known by all.
Tailor a procedure for every different situa-
tion
And that will lead you to a right destination!!

Official news letter of Karnataka State Chapter of Association of Surgeons of India Issue: 2/18: July 2018

Aim And Advantages

To help the deceased member's family

Premium is very minimum comparing to any Insurance scheme. Scheme solely works on members contribution.

Surgeons up to 65 years can join in the scheme.

No medical certification is needed to join the scheme.

Early settlement of death claim within a month.

Documents like Death certificate, membership identity and the City branch Secretary's Recommendation are only needed for the claim.

The bereaved family will receive an amount equivalent to 500 times the current net membership of scheme.

Eligibility of the Members

1. Any Life ASI member below the age of 65 years on the day of joining is eligible to become a member.
2. The members who joined scheme before 30.12.2017 are "FOUNDER MEMBERS"(Date extended on request)
3. The scheme started on 1.4.2017
4. Window period TWO YEARS i.e. Eligibility to claim will be after completing 24 months from joining scheme.
5. Fill up application form with specimen signatures of nominee with photos.
6. Members Photocopies to be attached: a) PAN Card c) ASI Membership Card d) Aadhar Card

Admission Fees:(One Time Only At The Time Of Admission)

1. Below 30 years	Rs.	5,000/-
2. Between 30 to 35 years	Rs.	6,000/-
3. Between 35 to 40 years	Rs.	8,000/-
4. Between 40 to 45 years	Rs.	10,000/-
5. Between 45 to 50 yrs	Rs.	15,000
6. Between 50 to 55 yrs	Rs.	20,000/-
7. Between 55 to 60 yrs	Rs.	25,000/-
8. Between 60 to 65 yrs	Rs.	30,000/-

This is the only fees that a Full Life ASI member pays according to age to enroll. *PI see Clause V of constitution.*

Annual Subscription (To Be Paid Annually from July every year)

Every member of the scheme shall pay Rs 1000/- per member every year. *PI see Clause VI.*

Fraternity Contribution(FC) (To Be Paid Annually from July every year)

Every member of the scheme shall pay a fraternity contribution of Rs. 500/- per death (if any) for a continuous period of 25 years. FC (No of Deaths X Rs 500/-) have to be paid together every year on notification. eg. If there are 5 deaths in a year then FC will be Rs 2500/- for that year. *PI see Clause VII.*

Honorary member

Those who make payments for 25 years continuously need not make any further FC payment. They will remain as honorary members of the scheme with all the benefits of an ordinary member. *PI see Clause VIII.*

Member's disqualification

1. Every member of the scheme shall pay the Annual Charge of Rs 1000/- and fraternity contribution at the rate of Rs. 500/- per death. The secretary of the scheme will send individual demand notice in the 3rd week of July showing the exact amount to be paid. The last date for payment without fine is 30th September every year, after that there will be a fine of Rs. 100/- per month. If the member does not make the payment within 90 days, a registered notice will be send at members cost. The membership shall stand terminated if the member does not make the payment within 15days of receipt of the notice. *Please see Clause IX of the constitution.*
2. If a member supplies any wrongful information in his application form or at any time during his membership term by which, he violates any provision and tries to obtain any benefit under this scheme, then after giving him an opportunity of being heard before the Managing Committee, if his explanation is not found satisfactory, the Managing Committee of the scheme shall terminate the membership of the member concerned subject to ratification by the General Body.
3. After termination of membership of any member, he can rejoin the scheme as a new member by paying stipulated admission fees.
4. If any member, at any time, for any reason ceases to be a member of ASI his membership of this scheme shall cease automatically but if such a member revives his membership of ASI within a period of 6 months, he can get his membership of the scheme revived on payment of stipulated fees. If he does not get his membership revived within the stipulated period, he will be treated as a voluntarily retired member.
